

ENGLISH SUMMARY

Page 18-26: Meetings

District Conferences: All three districts in Turkey have successfully completed their District Conference with a good attendance from the Rotarians, their spouses and friends. Attendance of D 2430 conference exceeded 600 people, while that of D 2440 was more than 500. As the District Conferences took place, the larger even of Rotary International took place in Lisbon. All three activities, occupy the pages in this issue.

Page 30-35: Clubs in action

Ege: The club opened a summer school for kinder garden aged children who were not able to attend such school because of economic problems. The school was chosen from among the Community Corps region of the club and the attendees received courses to prepare them for the first class of elementary year. Painting, music, gymnastics, drama courses will be taught during summer. Around 40 kids are attending the courses.

Gökdere: The drinking fountains at the school in RCC area of the club have been renovated as part of the last project of Rotary year 2012-13.

Göztepe: The steps of an amphitheater inside a park ground is being decorated with ceramics. The club invites anybody interested in mosaic art to participate and place their ceramics on the steps. The first stage of the project entails covering of the steps with ceramics. In the second stage, ceramics made by handicapped people will be

placing them in specially built walls around the amphitheater.

Konak: An elementary school classroom was furnished by the club. A small corner in the class was dedicated to the founder of modern Turkey, Atatürk.

Agora: Jointly with the municipality of the metropolitan City of Izmir, the club started courses to teach people with disabilities how to build puppets. The course will be offered to 20 people with disabilities between the ages of 16 and 20.

Bornova: The club organized a concert to raise funds for the purpose of donating an equipment to the genetic center of Dokuz Eylül University. The equipment will be used in the diagnosis of children with down syndrome. The new equipment will be able to analyze the DNA structures much faster and will help the doctors to test a larger number of patients. The director of the center told Rotarians that with the help of this new technology, they will be able to deal with 90 patients at a time, whereas before that, they were able to get busy with only 10.

Didim: "A bread on the hanger" is the name of a project that the club started on the first day of Ramadan. People buying bread at participating bakeries, will pay for one or more bread than they need. The bakeries in turn, will give these extras to the people in need. With such a scheme, neither people who are buying extra bread, nor the ones who are given bread for free will know in person who made the donation. In the first two days, 375 contributions and 191 need was matched.
