

**Kozyatağı:** On World Water Day, the club organized an activity called "Walking for water" to increase the awareness of the subject. Sponsored by Wilo pumps, club members, students from Doğa College and people from the community participated to the event.

**Ordu:** Early diagnosis saves life, was the name of the seminar organized by the club. The aim of the activity was to attract the attention to the subject of breast cancer. The seminar was organized for 300 women working at Progida Hazelnut Processing Integrated Facilities.

**İskenderun:** Rotarians, together with the Rotaractors and Interactors helped a school which lacked a playroom for the students, build and furnish such a facility. During the project, all the school rooms were painted by the young participants. Thanks to this new space created with the help of the Rotarians, 90 nursing school level students will be able to socially interact more on the premises.

**Ege:** The club, in a joint project with Agora Rotary Club of Izmir, started a blog site aimed at promoting and creating awareness about Rotary for the young people. The blog site can be reached at <http://gencrotary.tumblr.com> and is entitled Genç Rotary (Young Rotary). The founding clubs are asking all the clubs in Turkey to promote this blogsite in their facebook, twitter, pinterest and instagram like social sites.

**Bursa Rotary Clubs:** All the Rotary Clubs in Bursa, in collaboration with the municipality of Nilüfer, organized a concert on Rotary's week of World Understanding and Peace. The performance was given by the orchestra which was nominated as a candidate for 2012 Nobel Peace Prize. Antakya Civilizations Chorus is composed of members from different religions and sects singing psalms and canticles and trying to convey messages of love and understanding to the world. All members of the chorus are amateur musicians from three different religions and seven different sects. They come from the Antakya region, old Antioch, which is known to be one of the historical places where people from different backgrounds and religions lived in peace and harmony in the past.

**Ölüdeniz:** The club donated a smart blackboard to a school in Kaya Village reknown in the area as Friendship an Peace Village. This was the first time that a smart blackboard was installed in a school in the province of Fethiye. The blackboard is connected to a computer and a projector, which helps reflect different materials to the board. The Turkish government's Ministry of Education, is presently pursuing a project which aims to bring to all schools the smartboard technology
